EXPERIENCE

Web Developer   May 2016 – August 2016

Interactive Computer Solutions   Vaughan, ON

- Worked directly with clients to develop and design effective UI/UX solutions for client needs
- Led the design and development from start to production of a platform to improve client's ability to track their invoices with features including sales reporting, real-time updates and editing using web-RTC
- Built an image and pdf processor to improve productivity of the project manager when dealing with client requests
- Developed and modified WordPress plugins and themes
- Technologies used: HTML, CSS, JavaScript (jQuery) PHP, MySQL, Bootstrap, Laravel 4 & 5

Web Developer   September 2014 – April 2015

North Park Secondary School - Student Activity Council (SAC)

- Led the development of the SAC website with features such as a CMS, newsfeed, polls, and calendars
- Oversaw and delegated tasks to the junior web developer

PROJECTS

Find me a Job — https://git.io/vi7Kn   September 2016

- Worked in a team of 4 to develop a platform in assisting tech job seekers to find the jobs that match the skillset on their resume at Hack the North 2016.

Chapsule — http://chapsule.com   July 2015 – Present

- Cofounded a web/iOS platform (chapsule.com) where event organizers can engage with their audiences to share multimedia from their event.

ASL Jesters — *https://git.io/vznIE*   November 2015

- Developed an application to help teach American Sign Language (ASL) using Leap Motion and its JS API in a team of 3 at Hack Western 2.

Laughbubble — *https://git.io/vznkn*   Oct 2014 – Jan 2015

- Developed a web application within a team where users can upload, view, and rate humorous content using HTML, CSS, JavaScript, PHP and MySQL.
